

Map to the Stars' Homes

Michael Gintz

You may want to use the following tools for this one:

Google Earth Pro: <https://www.google.com/earth/versions/#earth-pro> (it's free!)

RA DEC Flexible Converter: <http://www.astrouw.edu.pl/~jskowron/ra-dec/>

Everyone needs someone or something to look up to, so it's good to know where to go to look up. If you're looking for that place, then have I got the guide for you! This guide will work especially well if you're using it around the epoch J2000, at a time of day when the First Point of Aries¹ (which lies on the celestial equator²) lies above the point 0°N, 180°W.

1. If you're a film buff interested in movie direction, you might find yourself in a Catch-22 if you don't check out the Serra Negra Biological Reserve.
2. You can shine no matter what you're made of! You might find advice like this meditating at Enekulla Zendo.
3. At the Frenchman Branch you might find an egg for these trying times.
4. If you're going to steal the Declaration of Independence, you should probably flee the States to evade capture. You might want to go to the Sunan Yugur Autonomous County to revel in your success.
5. Head down to Selfridge, ND for an experience that'll never let go.
6. Hopefully hunting down a celebrity isn't an impossible mission at Ozero Kimasozero.
7. For your 7th stop, you might not want to jinx it, but if you're lucky you might spot someone at Ma'anshancun, Linkou County.
